To whom it may concern:

Over the last 5 years we have contracted Shelter Cove Construction for various jobs. Beginning with a total renovation project which included knocking out existing walls and installing support beams. We have had everything from bathrooms renovated, kitchen cabinets replaced, a fireplace added, doors replaced, stairs added to outside decking, a picture window put into a wall, as well as cement work done in the yard for the installation of an outdoor shower. Each job was done in a timely matter with impeccable service. The men arrived when we were told they would and worked until the jobs were done. They never left for the day until they cleaned up after themselves leaving there work areas so clean you wouldn't even know they were here. We are presently considering adding a third floor to our home and without a second thought Shelter Cove will be doing the work. Beside the detail and quality of the work being outstanding the prices that we have paid have been more than fare and very reasonable.

We have recommended Shelter Cove Construction to various friends and family who then used there services and called to thank us. We will continue to use and recommend their services because we feel they provide superior quality work for the best price.

Sincerely,

Robert Mezey
